August 27, 2019

Gallatin County Community:

A potential incident has been shared with the FBI from an individual outside the United States. The Facebook post was reported to the FBI in Little Rock. It indicates there is going to be an incident at a Kentucky school August 28 and an Arkansas school August 29. This information has also been shared through the news media locally and nationally. Although no specific location was named in either state, I wanted to remind you of this information.

As you know, student safety is our number one priority. We have been in communication with Sheriff Neale and his office continues to be conscientious toward ensuring safety within our schools. Collectively, we will continue with a safe school environment through the diligence of school personnel and community partners.

Gallatin County School District will be open August 28, 2019.

Sincerely,

Larry B. Hammond
Superintendent
